## FullStack Developer

Full Stack Developer with training in web design at Henry Bootcamp. I have experience working with React, Redux, SQL, Node JS, among other technologies in the industry. Alongside a team, we developed an e-commerce platform where organization and communication were crucial. I excelled as the deploy manager and presented the final project to our evaluators, honing communication and leadership skills. I am seeking a position in IT that allows me to apply my acquired knowledge and learn new things.

## Projects

### StayFy

Academic Experience Henry Bootcamp - Final Project

StayFi is an exciting eCommerce project for books that provides users with a convenient and secure platform to explore and purchase a wide range of titles. With user and administrator features, implementation of logical deletion, and Scrum methodology.

#### Project features:

Google authentication

Cloud storage - (Cloudinary)

Email notification

Database integration

Payment methods (Mercado Pago)

Full deployment (Front - Back - Database)

**Front:** React - Redux - Tailwind - AOS

**Back:** Node JS - SQL

**Repository:** <https://github.com/lautaromateol/stayfy>

### Videogames Visualizer

Academic Experience Henry Bootcamp

An application for viewing video games, with the ability to apply sorting filters and search by name to access individual game information.

**Front:** React - Redux - CSS

**Back:** Node JS - SQL.

**Repository:** <https://github.com/AgustinRadocaj/Proyecto-Individual-VideoGames>
